

**Title:** Introduction to STME research  
**Credits:** 2 (~25 hours, about 1 contact session per week of 2 hours)  
**Semester 1:** August 13 to December 30

**Objectives:**

1. Motivation for STME research (Why STME research is necessary?)
2. Exposure to research in STME and research at HBCSE
3. Overview of issues (central themes) in science, technology and mathematics education research

**Concepts/ Issues/ Skills/ Questions:**

- Ability to search research materials in STME (article, chapter, etc.)
- Recognise the context of research (broad areas of research, and issues addressed by the article)
- Develop ability to follow cross references of interest, and identify those that are significant or have broad reviews
- Conduct literature review
- Identify some of the central themes in STME research,
  - eg. Student conceptions, Teacher education, Students' /Teachers' attitudes to STME, Classroom interaction and assessment, Application to real-world contexts, STME and society

**Classroom sessions:**

The course will cover 6 themes and there will be 2 sessions per theme. The instructor/invited speaker will discuss a paper in a theme and students have to select a paper in that theme for presentation in the next session. Each student will have 15 minutes for presentation of the paper where the highlights of the paper are to be discussed. A short write-up written in ones own words is expected to be submitted on the day of the presentation.

**Readings:**

1. **Introductory Session:** Anderson, C. (2007). *Perspectives on science learning*. In S. Abell & N. Lederman (Eds.). *Handbook of Research on Science Education*, pp.3-30. Taylor & Francis. (Book-A). **[in the folder]**
2. **Theme 1: Education and Society**
  - i) K. Krishna (2010). Culture, state and girls: An educational perspective. *Economic and Political Weekly*, Vol 45, Issue No. 17, April 24, 2010. **[available on library site]**
  - ii) Fennema, E. H., & Sherman, J. A. (1978). Sex-related differences in mathematics achievement and related factors: A further study. *Journal for Research in Mathematics Education*, 189-203. **[in the folder]**
  - iii) Reiss, M. (2008). Should science educators deal with the science/religion issue? *Studies in Science Education*, 44 (2). pp. 157-186. **[in the folder]**
  - iv) Greer, B. (2011). What is Mathematics Education for? In K. Subramaniam & A. Majumdar (Eds.) *epiSTEME 3 – Proceedings of the International Conference to Review Research in Science, Technology and Mathematics Education*. MacMillan. **[online HBCSE site]**

vi) Eilks, I., Moellering, J., Valanides, N. (2007) Seventh-grade students' understanding of chemical reactions: Reflections from an action research interview study. *Eurasia Journal of Mathematics, Science & Technology Education*, 2007, 3(4), 271-286 **[in the folder]**

vii) Vosniadou, S. (2012). Reframing the Classical Approach to Conceptual Change: Preconceptions, Misconceptions and Synthetic Models, In B. Fraser, K. Tobin & C. McRobbie (Eds.), *Second International Handbook of Science Education*, Part 1, pp. 119-130. Springer. **[book available online]**

### **Theme 5: Classroom Interaction and Assessment**

i) Ramadas, J. & Kulkarni, V. (1982). Pupil participation and curriculum relevance, *Journal of Research in Science Teaching*, 19 (5), 357-365, 1982 **[in the folder]**

ii) Jones, A. (2012). Technology in Science Education: Context, Contestation and Connection, In B. Fraser, K. Tobin & C. McRobbie (Eds.), *Second International Handbook of Science Education*, Part 1, pp. 811-822. Springer. **[ book available online]**

(iii) Spendlove, D. (2008). Creativity in education: a review. *Design and Technology Education: An International Journal*, 10(2). **[in the folder]**

iv) Larson, J. (1995). Fatima's Rules and Other Elements of an Unintended Chemistry Curriculum. Paper presented at *American Education Research Association (AERA)*, San Francisco. **[in the folder]**

v) Kawalkar, A. & Vijapurkar J. (2013)., Scaffolding Science talk: The role of teachers' questions in the Inquiry Classroom, *International Journal of Science Education*, 35(12) 2004-2027. **[available on library site]**

vi) Osborne, J. (2012). The Role of Argument: Learning How to Learn in School Science. In B. Fraser, K. Tobin & C. McRobbie (Eds.), *Second International Handbook of Science Education*, Part 1, pp. 933-949. Springer. **[book available online]**

vii) Sadler, T. & Dawson, V. (2012). Socio-Scientific Issues in Science Education: Contexts for the Promotion of Key Learning Outcomes, In B. Fraser, K. Tobin & C. McRobbie (Eds.), *Second International Handbook of Science Education*, Part 1, pp. 799-810. Springer. **[ book available online]**

#### **Activities:**

- 1) A literature review on one of the themes
- 2) List questions or statements of problems in STME that can be researched
- 3) For one of the questions, frame the research study

#### **Assessment:**

Students will be assessed based on their presentations,(40%) writeups (40%) and peer assessment (20%).

### Handbooks:

- *Abell, S. & Lederman, N. (Eds.). (2007). Handbook of Research on Science Education. Taylor & Francis. [relevant chapters scanned & available in the folder Book A]*
- *Fraser, B., Tobin, K. & McRobbie, C. (Eds.) (2012). Second International Handbook of Science Education, Springer. [book is available online but selected chapters are in folder Book B]*

### Journals:

- Contemporary Education Dialogue.
- Design and Technology education : An International Journal.
- Economic and political Weekly.
- Eurasia journal of Mathematics, Science and Technology Education.
- International journal of Science Education.
- International journal of Technology and Design Education.
- Journal for Research in Mathematics Education.
- Journal of Biological Education.
- Journal of Research in Science Teaching.
- Journal of Science Teacher Education.
- Science and Education.
- Science Education.
- Studies in Science Education.
- ZDM Mathematics Education.
