

Advanced Research Methods - B

Course Code: SCE401.2B

Instructors: Tathagata Sengupta and Ayush Gupta

Credits: 2

Course Outcome:

Sr. No.	On completing the course students will be able to
CO 1	Articulating what they are interested in pursuing as part of their dissertation research or field work, and their own motivations and purpose in doing so.
CO 2	Articulating what they mean by 'field' or 'site' of research.
CO 3	Articulating research questions and exploring methods and value frameworks that might be suitable for the pursuit of those questions.
CO 4	Placing research design in contact with broader philosophical questions and grounding their thinking in a historical understanding of social, political, economic and epistemic processes and ideologies.
CO 5	Critically examining and re-examining the relations between the researcher and the 'subjects' of research. In particular exploring the questions of harm and dominance, or those of liberation and care, resulting from the pursuit of specific educational research.
CO 6	Iterating over research focus, questions, and methods in light of classroom discussions critically examining these.
